# 1. recognized green professions

## 2. vocational training and dual system

---

- is regulated by ordinances
- generally, training period takes 3 years

### **training in the company:**

- practical application
- real-life situations
- contact to colleagues
- interaction with customers
- remuneration

### **training in vocational schools:**

- theoretical focus
- systematisation of subject matter
- contact to other trainees
- general education

a fourth of the training time can take place in a foreign country.

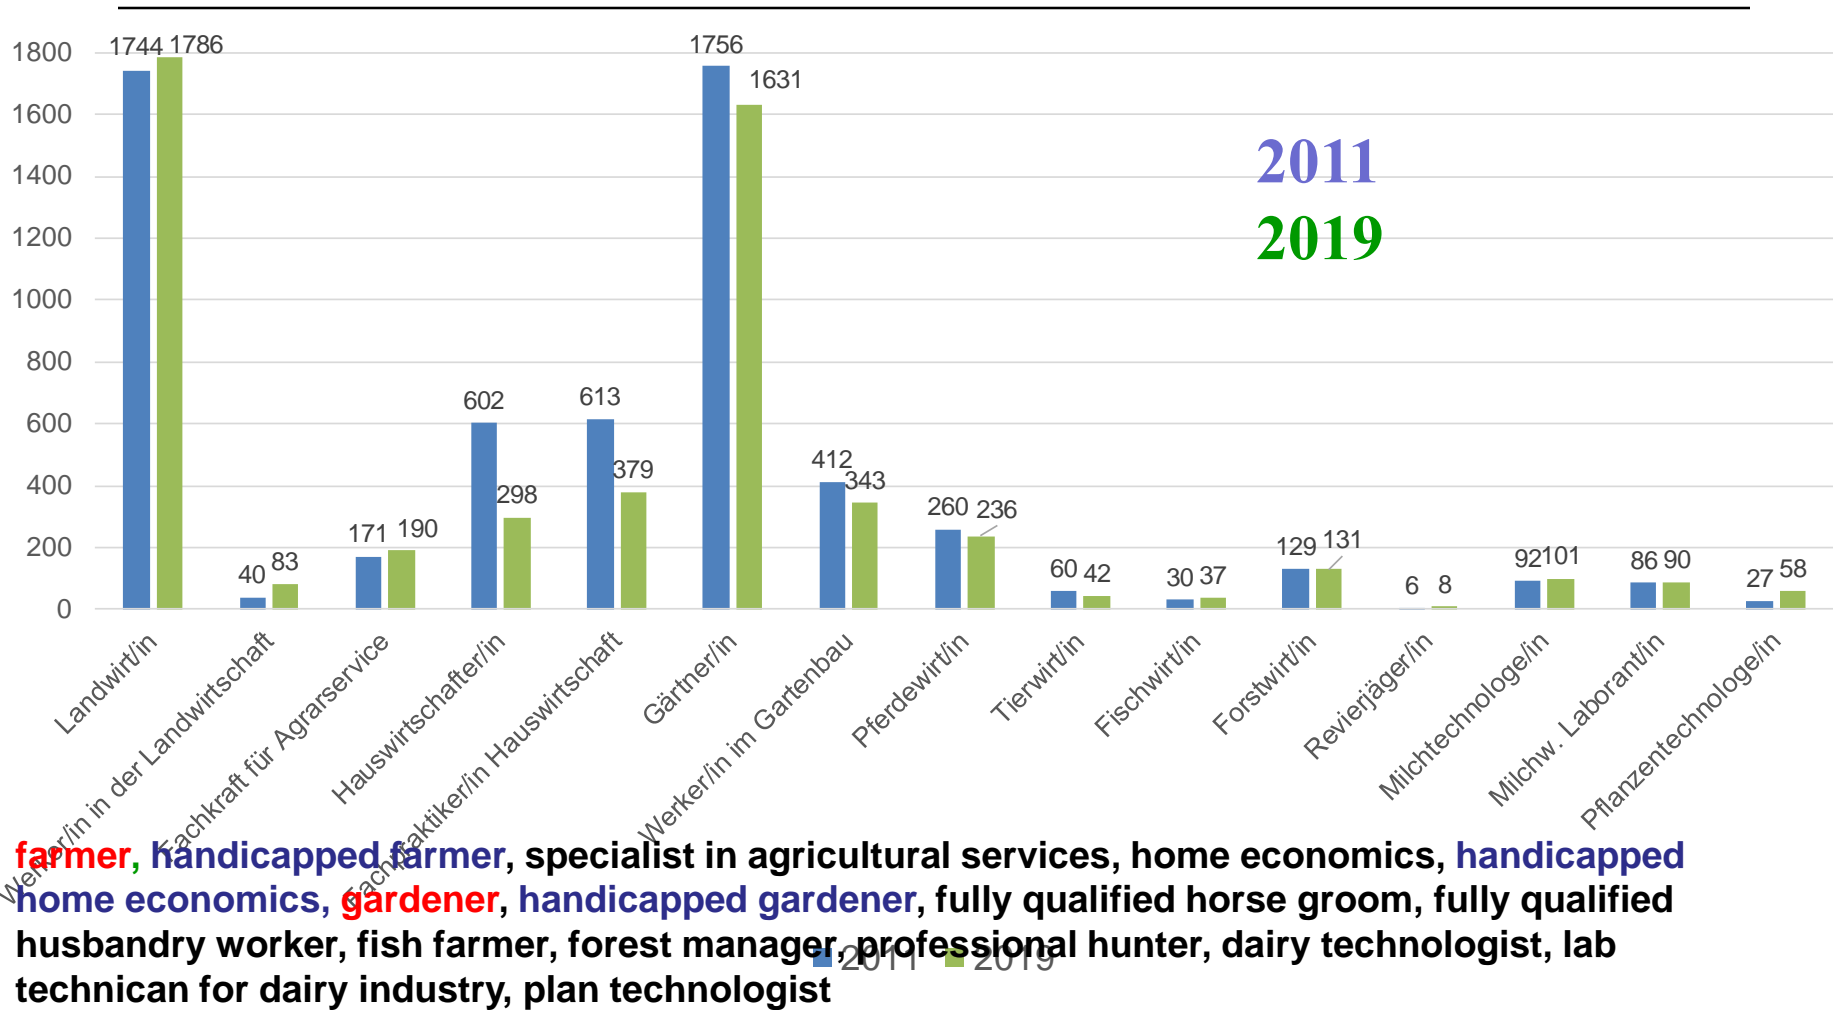

## 2. vocational training and dual system

---

### external vocational training

- complementary to training on the farm or in the business (companies)
- getting to know the entire spectrum of their farming profession for these green professions: farmer, gardener, dairy technologist
- bringing all trainees to the same skill level in the various fields
- learning skills required to receive the necessary certificates (husbandry, livestock transport etc.)
- learning skills and facts related to animal protection, environmental protection, sustainability and quality assurance (i.e. handling and monitoring animals, working with and treating animals)

### 3. development of apprenticeship contracts

<sup>1</sup> deadline 31.12. of a year

**thanks for your attention!**
